

AL-C Distribution Box

Overview

Logistic Packaging Attached Lid Containers (ALC) are high-performance reusable distribution totes engineered for closed-loop logistics. Conical Shape for Deep Nesting — Side taper allows denser nesting, reducing empty-container volume by up to 65–75 %. Equipped with two interlocking hinged lids, they provide secure product protection and efficient handling in retail, e-commerce, courier, and pharmaceutical. The ALC box is a great multi-use box. These are commonly known as Tote boxes. These reusable containers are stack and nest, using the lid for stacking and lid folded back for nesting. These containers are used largely with the distribution of items of cost as the lids can have tamperproof seal. Are you looking for a compact, easy-to-install waterproof fuse and relay box?

The HWB60-AL Series Hard-Wired Waterproof Power Distribution Box with AssureLatch™ is a great choice for protecting accessory circuits and overflow circuits from a main power distribution module (PDM). This DC power. TAKACHI ELECTRONICS ENCLOSURE CO. Aluminum die-cast boxes with excellent shock resistance, available in a total of 35 sizes! ***Available as BTO*** (built-to-order) IP65 protection class and impact resistant diecast aluminium box.
