

Ace light amplifier

Overview

The Solstice ® Ace™ was the first femtosecond ultrafast amplifier designed, built and tested to meet rigorous industrial standards. 7 deconvolution factor) is used to determine pulse width (FWHM) from autocorrelation signal as measured with a Newport PulseScout ® autocorrelator. Pulse width must be specified at time of purchase. Unlike guitar amps or studio monitor amps, ACE units emphasize robust channel routing (often 2-4 mic/line inputs), built-in effects (reverb, echo, pitch. This light source provides COOL, INTENSE WHITE light for all types of fiber optic illumination components and either meets or exceeds the performance standards of all the safety certification agencies like UL, ETL, CSA, and VDE. Ace Amplification is a French brand and its philosophy is to offer products designed with high end expertise and fully assembled by hand with thoroughly selected custom components sourced in Europe, aiming at offering technically advanced amps at reasonable prices. "Quality for all" is Ace. ab. The powder coated U-shaped steel pro-file comes in various colors, offering flexible design op-ti ns. Designed by Jacco Maris in collaboration with Meneer Voss, it com-bines style and functional. A Gaussian pulse shape (0.
