

Aggregation Switch with 24 Fiber Ports

AI Overview

Aggregation switches with 24 fiber ports provide high-speed connectivity, Layer 2/3 management, redundancy, and advanced network features suitable for enterprise and SMB networks. Key Options and Features

TP-Link Aggregation Series Offers all-fiber ports with speeds up to 25 Gbps. Supports Static Routing, DHCP Server, ACL, IGMP Snooping, STP, LAG, and centralized cloud management. Some models allow physical stacking and advanced Layer 3 features for scalability and reliability.

Cambium Networks cnMatrix EX3024F Fully managed fiber aggregation switch with 24x 10 Gbps SFP+ ports. Provides Layer 2 and Layer 3 capabilities, enhanced access security, zero-touch deployment, and policy-based automation. Includes dual internal power supplies for redundancy and a non-blocking line-rate architecture.

Lantronix SM24DP4X Layer 2 managed switch with 24 dual-speed fiber slots and 4x 10G aggregation ports. Switching capacity of 128 Gbps with QoS support for 8 traffic types. Centralized management software available for network monitoring and control.

Grandstream GWN7830 Series Layer 3 aggregation switches with up to 24 SFP ports and 12 SFP+ ports. Supports advanced VLAN, QoS, IGMP/MLD Snooping, and comprehensive security features. Management via local Web UI, CLI, GWN.Cloud, or GWN Manager for flexible deployment.

QSFPtek S5300-24S8T6X Ethernet-managed aggregation switch with 24x GE SFP ports, 8x GE RJ45, and 6x 10GE SFP+ uplinks. Switching capacity of 184 Gbps and forwarding rate of 138 Mpps. Supports stacking up to 8 switches, 1+1 redundant hot-swappable power supplies, and advanced QoS, LACP, MSTP, ERPS, and VRRP for high reliability.

Considerations for Selection

- Port Speed:** Ensure the switch supports the required fiber speed (1G, 10G, or higher).
- Layer 2/3 Features:** Choose based on whether routing, VLAN segmentation, or advanced QoS is needed.
- Redundancy:** Dual power supplies and stacking capabilities enhance network reliability.
- Management:** Cloud-based or local management interface.
