The distribution box (DB box) helps safely and efficiently distribute electrical power. Today, electrical systems are essential for homes and industries. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. The Switchgear manufacturer AP Elektrotechnik GmbH (APEG) from Rechnitz in Burgenland (Austria) is facing up to the demands of Industry 4. APEG has been manufacturing switchgear for the industrial sector since 2002, for use in sewage treatment plants, pumping stations or the. A distribution board (also known as panelboard, breaker panel, electric panel, DB board or DB box) is a component of an electricity supply system that divides an electrical power feed into subsidiary circuits while providing a protective fuse or circuit breaker for each circuit in a common.
