

Australian Fiber Optic Cable Relay Frame IK10

Overview

Rugged Construction: Impact test rated IK10, with a pull force of 100N. **Durable Materials:** All stainless steel plates and anti-rusting bolts/nuts. For LED lights, IK08 is often enough for normal commercial spaces, IK09 fits tougher industrial or outdoor areas, and IK10 is preferred where vandalism, sports impacts, loading docks, or hazardous-location abuse are realistic risks. The Clos-8A-192 fiber optic splice closure can accommodate up to 192 splicing points as an outdoor closure. It serves as a splicing point for feeder cables to connect with distribution cables in FTTx backbone network systems. FIBOX, ALMATEC, ICOTEK, and AUER SIGNAL products are available in Australia via IP Enclosures Distribution Partners. This closure integrates fiber splicing, storage, and cable management. Beginning with optical ground wire (OPGW), introduced in 1984 as AFL's flagship product, the line now spans to fibre optic cabling solutions being used in the world's harshest environments, including those above ground, below ground and even underwater. Enhance your network performance with reliable, innovative products.

Article Content

Fibre Optic Cable and Accessories

4Cabling's fibre optic cables are the installers choice Australia wide. Our fibre is manufactured to the highest grade with stringent quality guidelines. Each one of our fibre optic cables are tested and

Fibre Optic Supplier Australia | Anderson Corporation
