

Australian air-cooled 40G switch

Overview

VPX board with 40 Gigabit fully managed 3U VPX Layer2/3 Gigabit Ethernet switch for harsh environments, offering secure management interfaces and availability with VITA65 and SOSA profiles. FS 40G Ethernet Switches with high speed and port density give you cost-effective options to incrementally upgrade and have flexible bandwidth across the existing infrastructure in enterprise campus network. FS 40Gb Switches offer high bandwidth, network virtualization, and redundancy, ensuring efficient deployment for campus core and distributed networks. The Curtiss-Wright VPX3-655 is a very versatile Ethernet switch supporting 1G, 10G and 40G ports, including 12x 10GBASE-T ports, providing high-speed connectivity for modular embedded computing applications. Modern mission systems ingest, fuse, and communicate with a range of sensors to build an. The ComEth4081e is an upgraded release of IC's ComEth4080a and ComEth4080e 3U VPX L2/L3 Ethernet Switches, a product line designed for system integrators looking for high-speed Ethernet-based centralized architectures with a high availability of external 1/10/40G Ethernet interfaces, and aiming at. WOLF's Model XMC-FGX2-SDI-4IO is the next generation of frame grabbing technology. As well as maintaining support for legacy analog systems. Available in rugged conduction cooled or air-cooled versions.
