

Belgian Smart Electronic Patch Panel

Overview

Belden PatchPro® offers a complete intelligent ready physical layer management system that uses RFID (radio frequency identification) technology for wireless identification of individual patch cords and real-time monitoring of unintended physical changes in network infrastructure. MapIT G2 integrates the powerful combination of innovative Smart Patch Panels, user-friendly Master Control Panels and EagleEye™ software to provide real-time tracking and reporting of network-wide physical layer activity. The system continuously monitors your network, increasing physical layer. SMARTPATCH provides simple and controlled management and recording of common network changes such as those resulting from office moves and terminal additions. If a connector of an intelligent patch cord is now connected with the patch panels port, the cable ID is recognized. The second side of the patch cord has the same cable ID and when the. Leviton offers the industry's best global patch panel service and logistics with a wide array of flexible solutions for every application, backed by industry leading service and support. This solution will enhance security by monitoring for equipment disconnects and cyber security in enterprise and colocation data centers as well as.
