

Belgian composite optical cable

AI Overview

Composite optical cables in Belgium, including OPGW types, are used for both power utility grounding and high-speed data transmission, with several local manufacturers and distributors available. Overview Composite optical cables, such as OPGW (Optical Ground Wire), serve a dual purpose: they act as a ground or static wire for power utilities while simultaneously providing a path for optical fiber transmission of voice, video, or data signals. These cables are designed for high tensile strength, long spans, and crush resistance, with fibers housed in a stainless steel tube filled with water-resistant jelly, further protected by an aluminium pipe and layers of aluminium-coated steel or alloy wires. This construction ensures reliable, cost-effective, and durable installations.

Applications

- Power utilities: Grounding and lightning protection while enabling high-speed communication.
- Telecommunications: High-bandwidth data transmission for networks, data centers, and FTTH (Fiber to the Home) deployments.
- Industrial and professional AV systems: Fiber optic connectivity for audio, video, and control systems.

Types and Configurations

- Single-mode fiber: Optimized for long-distance, high-speed data transmission.
- Multimode fiber: Suitable for shorter distances with high bandwidth.
- Plastic optical fiber: Offers flexibility and durability for specific industrial or networking applications.

Belgian Suppliers and Manufacturers

- Norden Communication: Offers OPGW composite optical cables with high mechanical and electrical performance.
- Belram: Distributor of fiber optic cables, connectors, and interconnection systems for professional applications in Belgium and Luxembourg.
- Netconnect, Fiber Connect, Unifiber, A-NET, NetTech: Companies specializing in fiber optic network installation, structured cabling, and high-speed internet solutions across Belgium.
- Farnell Belgium: Supplies plastic and glass fiber optic cables for telecommunications and networking.

Considerations
