

Branded Cable Tray Stamp

AI Overview

Cable tray brand stamps are markings applied by manufacturers to identify the brand, material, and compliance of the tray. Purpose of Brand Stamps Cable tray brand stamps serve several purposes: they identify the manufacturer, indicate the material type (e.g., galvanized steel, stainless steel, FRP), and often include compliance with industry standards such as UNE-EN 61537 for perforated trays . These stamps ensure traceability, help with warranty claims, and assist in maintenance or replacement of trays in industrial and commercial installations. Types of Markings Brand stamps can appear in different forms: Stamped or embossed directly on the tray during manufacturing, often on the side or base of the tray . Engraved or printed labels attached to the tray, which may include the brand name, part number, and certification marks . Self-adhesive or heat-shrink labels for additional identification, especially in harsh environments where corrosion or abrasion is a concern . Materials and Durability Cable trays are made from galvanized steel, stainless steel, FRP, or plastic, and the brand stamp method is chosen to withstand the tray's environment. For example, stainless steel trays may have engraved or embossed stamps, while plastic trays may use printed or molded markings . Labels are often chemical- and UV-resistant to ensure longevity in outdoor or industrial settings . Industry Standards and Compliance Brand stamps often indicate compliance with electrical and safety standards, helping installers and inspectors verify that the tray meets regulatory requirements. Proper labeling also aids in cable management, maintenance, and safety, reducing errors during installation or repairs . Summary When selecting or inspecting cable trays, look for manufacturer stamps or labels that clearly indicate the brand, material, and standard compliance. These markings are essential for traceability, safety, and maintenance in both indoor and outdoor installations, and they may be applied via stamping, engraving, or durable l...
