

Cable tray fixing bracket price on construction site

AI Overview

Cable tray fixing brackets typically cost between \$2 and \$25 per piece, depending on material, size, and finish. Price Range and Factors The cost of cable tray brackets varies widely based on several factors:

Material: Common materials include galvanized steel, stainless steel, and aluminum. Stainless steel brackets are more expensive due to corrosion resistance, while galvanized steel offers a balance of durability and cost. Aluminum is lightweight but generally pricier than steel ().

Type and Size: Stand-off brackets, G hanger supports, and trapeze support brackets differ in design and load capacity. Sizes range from 50mm to 300mm, with larger or heavy-duty brackets costing more ().

Surface Finish: Hot-dipped galvanized (HDG) or pre-galvanized coatings improve corrosion resistance but increase the price. Powder-coated or zinc-plated finishes also affect cost ().

Installation Complexity: Adjustable or specialized brackets for modular or overhead installations may be more expensive due to design and labor requirements ().

Quantity and Supplier: Bulk orders can reduce unit cost by 20–40%, while sourcing from international suppliers may lower prices further ().

Typical Pricing

- Standard small brackets: \$2–\$5 per piece for basic galvanized steel stand-offs or small G hangers ().
- Medium-duty brackets: \$5–\$12 per piece for larger or adjustable brackets suitable for 100–150mm trays ().
- Heavy-duty or stainless steel brackets: \$12–\$25 per piece for high-strength, corrosion-resistant brackets used in industrial or outdoor environments ().

Additional Considerations

Project Location: Prices may vary depending on local labor costs, shipping, and site accessibility ().

Compliance: Ensure brackets meet local electrical codes and standards (e.g., DIN EN 61537, NEC) for safety and durability ().

Accessories: End brackets, adjustable supports, and mounting hardware may add...
