

Current Price of Vertical Shaft Cable Trays

AI Overview

The price of vertical shaft cable trays varies widely depending on material, size, load capacity, and supplier, typically ranging from \$20 to \$200 per meter for standard models.

Pricing Overview

Vertical shaft cable trays are available in steel, aluminum, and fiberglass. Steel trays, often galvanized or painted for corrosion resistance, are generally the most cost-effective for heavy-duty applications, while aluminum and fiberglass trays are more expensive due to their lightweight, corrosion-resistant, and non-conductive properties. Prices are influenced by:

- Material type:** Steel < Aluminum < Fiberglass
- Tray dimensions:** Width, depth, and thickness affect load capacity and cost
- Load rating:** Higher load-bearing trays cost more
- Customization:** Special sizes, perforations, or coatings increase price
- Supplier and region:** International suppliers like Shandong Bolt Electrical Equipment provide competitive pricing, often with bulk discounts

Typical Price Ranges

- Standard steel vertical shaft trays: \$20–\$50 per meter
- Aluminum trays: \$50–\$120 per meter
- Fiberglass trays: \$80–\$200 per meter

These prices are indicative and may vary based on order quantity, shipping, and local market conditions. For precise quotations, suppliers like Shandong Bolt Electrical Equipment and platforms such as Alibaba allow users to request detailed pricing based on specific project requirements.

Additional Considerations

When budgeting for vertical shaft cable trays, consider:

- Installation costs:** Labor and mounting hardware
- Compliance:** Ensure trays meet local electrical and fire safety standards
- Future expansion:** Modular or adjustable trays may have higher upfront costs but reduce long-term modification expenses

By evaluating material, load requirements, and supplier options, you can select a vertical shaft cable tray that balances cost, durability, and safety for your project.
