

Current Status of Optical Cables in Lithuania

Overview

The optical cable damaged last week in the Baltic Sea between Lithuania and Latvia near Liepaja has been repaired, and communication through it has been restored. From 2018 to 2021, the Lithuanian market for insulated wire and optical fibre cables expanded from 28 460 t to 46 603 t. This growth was supported by the ongoing modernization of AB Lietkabelis, the main state-influenced producer, and rising demand for optical fibre cables driven by the rollout of 5G. The Lithuanian optical fiber cables market operates within a global landscape dominated by major producers and consumers. The report provides a strategic analysis of the singlemode optical fiber cables. This report presents a comprehensive overview of the optical fibre cables market in Lithuania and a forecast for its development in the next five years, taking into account the impact of COVID-19 on it.
