

Custom-made Thickened Galvanized Cable Tray Price

AI Overview

Custom-made thickened galvanized cable trays typically range from \$15 to \$50 per meter, depending on material, thickness, and customization options.

Price Overview

The cost of a custom galvanized cable tray depends on several factors including the type of galvanization (pre-galvanized or hot-dip), material (carbon steel, stainless steel, or aluminum), tray thickness, dimensions, and load capacity . Standard hot-dip galvanized ladder-type trays are priced per 2.4-meter section, while custom perforated or thickened trays may be priced per meter or per unit . Factory prices for custom trays generally start around \$15–\$20 per meter for basic steel options and can go up to \$50 per meter or more for heavy-duty, thickened, or stainless steel variants .

Factors Affecting Price

Material: Carbon steel is the most economical, while stainless steel 304/316 or aluminum increases cost due to corrosion resistance and durability .

Thickness: Thicker trays designed for heavy-duty applications or high load-bearing capacity cost more.

Surface Finish: Options include pre-galvanized, hot-dip galvanized, or powder-coated finishes, with hot-dip galvanization generally being more expensive due to superior corrosion protection .

Customization: Custom lengths, perforation patterns, and tray shapes (ladder, trough, or wire mesh) influence pricing .

Quantity: Bulk orders often reduce the per-meter cost, while small orders or highly specialized designs may increase it.

Supplier Options

JLH Cable Tray offers pre-galvanized steel trays suitable for industrial and commercial installations . Shandong Hongfeng and Alibaba suppliers provide custom perforated hot-dip galvanized trays with flexible material and size options . Ramdev Steel Industries manufactures hot-dip galvanized ladder trays and powder-coated options for heavy-duty applications .
