

Electronic products for fiber optic communication

Overview

Fiber Optic related components include transceivers for transmitting and receiving optical signals, fiber optic sensors, Flat and Dome Lenses, and more. Parts are used in industrial Ethernet equipment, copper-to-fiber media conversion, intra-system fiber optic links, and video. When it comes to capacity and throughput, no other physical media can come close to matching fiber optics. Rugged end-to end solutions for more bandwidth, more. FiberElectronics, LLC provides performance-certified, high-quality physical layer components with unmatched speed, flexibility, and reliability for leading networks like NYSE, Facebook, and Ciena. In addition to numerous fiber cable types, we offer a wide range of fiber optic components, such as fiber optic connectors, fiber pigtailed, splice. Contributing to the realization of digital transformation (DX) by enabling high-speed/high-capacity optical fiber communication when equipped in large-scale data centers, optical fiber communications for homes (FTTH), mobile communication base transceiver stations (BTS) such as 5G, and various. Octopart connects you with top-tier fiber optics distributors, offering a wide range of components, detailed specifications, and real-time availability. Going forward, Hitachi High-Tech will not only offer a more complete one-stop service, but also provide engineering and.
