

Explosion-proof distribution box explosion-proof cast aluminum box

Overview

The distribution box (explosion-proof) is an aluminum alloy housing, electrostatic spraying, in accordance with the explosion-proof provisions of GB3836. Other countries and continents have different safety guidelines in this area (IECEx, TR-TS, NEC etc.) – often these are derivatives of. These explosion-proof enclosures are the spearhead in terms of safety and provide optimum protection for your installed components against the ingress of gas, dust or water. These die-cast aluminum explosion-proof boxes are designed for intermittent Explosive atmospheres (excludes mining) such as Gas (Category: II, Zone: 1&2) Grain. Eaton's Crouse-Hinds series CEAG AboX junction and terminal enclosures are engineered for safe and reliable performance in a wide range of hazardous area and harsh applications within oil & gas, petrochemical, chemical and other heavy industries. It is also used in flammable dust places such as military industry, port, grain storage and metal processing; 2. Applicable to Zone 1 and Zone.
