

Fireproof cable tray models and prices

AI Overview

Fireproof cable trays are available from multiple brands such as NewReach, Holdee, and various Chinese manufacturers, with prices depending on material, size, and fire rating.

Popular Brands and Suppliers

- NewReach:** Offers fire-rated cable trays made from stainless steel, galvanized steel, tempered glass, and fire-resistant polyester fiberglass. Their trays feature powder-coated finishes, 2-hour fire ratings at up to 1050°C, and load capacities of 10 kg/m on a 1.65-meter span. They comply with ISO 834-1, EN 1363-1, DIN 4102-12, and AS/NZS 3013:2005 standards. Pricing is typically provided on request, reflecting customization and material choice.
- Holdee (China):** Supplies perforated steel, stainless steel, and aluminum alloy cable trays, including ladder, wire mesh, and trough types. They offer factory-direct pricing for bulk orders, with customization options for dimensions and coatings.
- Other Chinese Manufacturers:** Many suppliers provide FRP (fiberglass) and GRP cable trays, corrosion-resistant galvanized steel trays, and heavy-duty wire mesh trays. Prices vary widely depending on material, thickness (0.5–2.0 mm), and order volume.
- HSP Fire Protection (UK):** Offers fireproof pillows, pads, and wraps for cable trays and trunking, which enhance fire resistance for existing installations. These products are priced per unit and can be customized in color.
- Alibaba Suppliers:** Provide a wide range of powder-coated, perforated, and fireproof cable trays suitable for indoor and outdoor use. Bulk orders often receive discounts, and prices are generally negotiable depending on quantity and specifications.

Price Considerations

- Material:** Stainless steel and fiberglass trays are more expensive than galvanized steel or aluminum.
- Fire Rating:** Higher fire resistance (e.g., 2-hour rating) increases cost.
- Size and Load Capacity:** Wider trays or those designed for heavy loads cost more.
- Customization:** Custom lengths, coatings, or perforation patterns can affect pricing.
- Bulk Orders:** Ordering in large quantities often reduces per-unit cost.
