

Floating Optical Cable Price List

AI Overview

Floating or aerial optical cables typically range from \$0.40 to \$1.50 per meter, depending on fiber count, construction, and environmental specifications. Price Range For fiber optic cables suitable for floating or aerial deployment, indicative prices are:

- Aerial / Self-Supporting Cable: \$0.40 – \$1.50 per meter
- Armored Cable (Steel Tape / FRP): \$0.30 – \$1.00 per meter
- Single-mode Outdoor Cable: \$0.10 – \$0.50 per meter
- Multimode Outdoor Cable (OM1/OM2/OM3): \$0.10 – \$0.60 per meter

These prices reflect standard configurations; custom-built or high-strand-count cables can cost significantly more.

Factors Affecting Cost

- Fiber Count:** Higher strand counts increase cost proportionally. A 2-core cable is much cheaper than a 24-core or 96-core cable.
- Cable Construction:** Loose tube, tight-buffered, armored, or non-armored designs affect material and production costs. Armored cables for harsh environments add 20-50% to the base price.
- Jacket Material and Environmental Rating:** Outdoor-rated jackets (PE, UV-resistant) are more expensive than indoor PVC or LSZH jackets. Direct-buried or flame-retardant cables require additional testing and certification.
- Pre-Termination:** Factory-terminated cables cost more upfront but reduce field labor by up to 70%, which can be a significant cost-saving for large projects.
- Fiber Type:** Single-mode fiber is generally cheaper per foot than multimode fiber, but high-performance glass cores for long-distance transmission are more expensive than plastic optical fibers.
- Wholesale vs. Retail**

Wholesale bulk purchases: \$0.09 – \$1.52 per foot (\$0.30 – \$5 per meter), depending on strand count and cable type.

Retail or pre-terminated assemblies: \$1 – \$6 per foot (\$3 – \$20 per meter), especially for high-strand-count or specialized outdoor cables.

Practical Considerations

When budgeting for floating optical cables, consider:

- Project scale:** Buying in reels (10 km+) reduces unit cost.
- Installation environment:** Harsh marine or aerial conditions may require armored or UV-resistant jackets.
- Labor costs:** Pre-termi...
