

Gabon Cloud Architecture Core Switch

Overview

Includes dual power supplies, hot-swappable modules, link aggregation (LAG), and support for HSRP/VRRP. Modular chassis or stackable designs make it easy to scale as your network grows. 1X support, SNMP, CLI/Web GUI, and network access control. Gabon plans to formally launch its first domestically located data center on June 30, 2026, at the Nkok Special Economic Zone near Libreville. The announcement followed a meeting between Digital Economy Minister Mark-Alexandre Doumba and the team behind the project. The facility, built by Gabonese. A core switch is the backbone of a large-scale network, designed to handle massive volumes of traffic with ultra-low latency and maximum reliability. Sitting at the top of the hierarchical model, core switches interconnect distribution layer switches and provide high-speed data transfer across. Sovereign and high-performance infrastructure hosted in Gabon (Libreville). Data Sovereignty: Your data stays within the national territory.
