

Georgia Optical Cable

AI Overview

Georgia's main optical cable infrastructure includes a wide range of fiber optic cables for both commercial and residential applications, supported by local suppliers and detailed installation standards. Fiber Optic Cable Types and Specifications In Georgia, fiber optic cables are available in singlemode and multimode varieties, with fiber counts ranging from 2 to over 864 strands, suitable for FTTX (Fiber to the Home) applications and large-scale network deployments. Cables are offered in loose tube, indoor, indoor/outdoor, plenum, breakout, tight buffer, and bend-insensitive designs, with options for high-speed 10 Gigabit networks. Outdoor cables (OSP) can range from 6 to 864 fibers, often requiring special orders for high-count strands. Installation of these cables follows Georgia Department of Transportation (GDOT) specifications, which include requirements for cable, interconnects, patch cords, closures, splices, and testing procedures. Contractors must submit detailed submittal packages for approval before installation, ensuring compliance with manufacturer recommendations and project standards. Local Suppliers and Manufacturers Georgia hosts a variety of fiber optic cable suppliers and manufacturers, including Applied Fiber Telecommunications, Inc., Automated Systems Design, Inc., OFS, and Litra, among others. These companies provide custom fiber assemblies, jumpers, patch cords, and pre-terminated interconnection cables, serving industries such as telecommunications, industrial automation, and network infrastructure. Distributors like American Tech Supply offer fast shipping and a wide selection of fiber optic cables from multiple manufacturers. Market Overview The optical fiber cable market in Georgia is influenced by growing demand for high-speed internet, FTTX deployments, and industrial automation. Market reports indicate steady growth in both volume and value, with major players focusing on expanding infrastructure and meeting increasing connectivity needs. The market is structured around large-scale...
