

Guyana Stainless Steel Cable Tray Specifications

Rear of the optical fiber distribution box

AI Overview

Stainless steel cable trays in Guyana are available in various types, sizes, and grades, including ladder, perforated, and channel styles, with widths from 50mm to 1200mm, depths from 50mm to 150mm, and lengths from 1m to 6m. Material and Construction Stainless steel cable trays in Guyana are typically made from 304 or 316 grade stainless steel, offering excellent corrosion resistance, durability, and suitability for harsh environments such as chemical plants, offshore facilities, and industrial installations. They are designed to withstand heavy loads, resist rust, chemicals, UV exposure, water, and high temperatures. Some trays feature a chrome finish for added durability and aesthetic appeal. Tray Types Ladder Style: Features rungs for supporting heavy cables and allows good air ventilation. Perforated Style: Offers ventilation and easy cable management, with side heights typically ranging from 50mm to 100mm. Channel Style: Provides enclosed support for cables, often with covers to protect against dust and debris. Dimensions Width: 50mm to 1200mm, accommodating small to large cable bundles. Depth / Side Height: 50mm to 150mm, with common side collars of 50mm, 75mm, and 100mm. Length: Standard tray lengths range from 1m to 6m, with some manufacturers offering 2.5m and 3m sections with a tolerance of ± 5 mm. Thickness: Stainless steel trays are available in 0.5mm to 3.0mm thickness, depending on load requirements. Features and Benefits Corrosion Resistance: Suitable for indoor and outdoor applications, including marine and chemical environments. Durability: High strength construction ensures long-term cable support. Versatility: Can be installed on floors, ceilings, or walls, and easily modified on-site due to wire mesh or perforated designs. Compliance: Many trays meet international standards and NEC regulations for safe cable management...
