

H3C Optical-to-Electrical Module Model

Overview

The H3C SFP GE SX MM850 A is a Gigabit Ethernet SFP optical module designed for short-range fiber connections using multimode fiber. It operates at 850nm and supports the 1000BASE-SX standard, enabling up to 1Gbps transmission for distances typically reaching 550m depending on the. Table 1 describes transceiver modules and network cables available for H3C devices. For. A transceiver module converts electrical data signals to laser light, which is then transmitted over an optical fiber. It can transmit optical signals over long distance with low signal loss.
