

H3C core switch does not shut down when power is changed

Overview

This symptom is very likely caused by a Console terminal setting error. In this case, check that you have set the baud rate to 9600, data bits to 8, parity to None, stop bits to 1, flow control to None, and select VT100 as terminal emulation. To prevent a failure from causing loss of configuration, save the configuration each time you finish configuring a feature. When you troubleshoot the switch, follow these general guidelines:

- To help identify the. This section describes how to troubleshoot unexpected switch reboot, power supply failure, and fan tray failure. To troubleshoot ports, see " Troubleshooting ports. "
- The switch reboots unexpectedly when it is operating. CRC error has occurred or that no system software image is available during the BootWare loading process, reload the system.
