

Handheld Light Source Calibration in the UAE

AI Overview

Handheld light source calibration in the UAE is widely available through ISO/IEC 17025-accredited laboratories, ensuring precise, traceable, and reliable measurements for professional and industrial applications. Key Providers and Services

Middle East Calibration Lab (MECL) offers ISO/IEC 17025-accredited calibration for light meters, including handheld devices, with a measurement range from 10 to 50,000 lux and a precision of $\pm 1.6\%$ of the reading ($k=2$). Their services are traceable to international standards and cover sectors such as healthcare, manufacturing, environmental science, and energy across Dubai, Abu Dhabi, Sharjah, and the UAE. Quality Technical Services (QTS) provides both supply and calibration of handheld and portable light meters. They support digital, photometric, RGB/color, and environmental light meters. Calibration is ISO 17025-accredited and can be performed in-lab or on-site across all Emirates, ensuring accurate, repeatable, and traceable results. AAB Calibration Services (AABCAL) is another leading provider, offering fast, accredited calibration for a broad range of instruments, including handheld light meters. Their ISO/IEC 17025:2017-accredited laboratory ensures compliance with international standards and supports industries requiring high-precision measurements. Al Mahasin Calibration Devices LLC (AMCAL) specializes in calibration for diverse measuring instruments, including handheld light meters. Accredited to ISO/IEC 17025:2017 and ISO 9001:2015, AMCAL provides both calibration and consultancy services, serving multiple industries across the UAE.

Calibration Process and Standards Handheld light source calibration typically involves:

- Traceability to SI units to ensure international standard compliance.
- Precision verification across the meter's measurement range.
- In-lab or on-site calibration dep...
