

High-precision optical power meter line finder

Overview

Use this kit to verify optical loss and power levels at 850, 1300, 1310, and 1550 nm, inspect fiber end-faces, locate cable faults, connector problems, and polarity issues. Kit includes FI-500 FiberInspector Micro. Keysight optical power meters measure optical signal strength, providing multi-channel measurement processing and system control while offering rapid response times, wide dynamic range, and simple integration into automated test setups. Note that Newport and ILX Lightwave products are not cross-compatible. See our. Global Recycled Standard (GRS) certified products contain recycled content that has been independently verified at each stage of the supply chain, from the source to the final product and meet social, environmental, and chemical requirements. Our tools are indispensable for professionals requiring accurate fiber testing. Simple-to-use fiber-loss tester with advanced time-saving features. Choose from various kits with configurations to meet your fiber verification, inspection, and cleaning needs.
