

Home Network Power Distribution Box

Overview

Home Network & Power Distribution Box is a compact integrated terminal device designed for modern households, combining network communication cable management and household power distribution functions. A power distribution box is a key part of any electrical system—it's the place where electricity from a main source gets divided and sent out to different circuits. You might also hear it called a PDU (Power Distribution Unit), distro, or distribution panel depending on the setup and environment. It addresses the centralized access, distribution, and safety protection of incoming. The KinCony Smart Distribution Box combines the powerful B32M controller and N30 Energy Meter to create a professional-grade intelligent power management solution for homes, villas, offices, RVs, hotels, and industrial automation projects. A wrong choice can lead to tripping, failed inspection, or costly rework. They help control appliances and make homes safer with new safety systems. More families trust smart. Indication Lights: These provide visual availability and status of mains power supply.
