

How much does a high-density ladder-type cable tray cost

AI Overview

High-density ladder-type cable trays typically range from ₹90 to ₹150 per meter in India, with prices varying based on material, thickness, and width. High-density ladder cable trays are designed for robust cable management in industrial, commercial, and data center environments, supporting heavy cable loads while ensuring ventilation and easy maintenance. They are commonly made from carbon steel, aluminum, or stainless steel, with surface treatments like galvanization or powder coating to enhance durability and corrosion resistance. Thicknesses usually range from 1mm to 2mm, and widths can extend up to 900mm, depending on the cable load and installation requirements.

Pricing Overview IndiaMART suppliers list starting prices for ladder cable trays at ₹90 per meter for basic models, with slightly higher prices (around ₹98 per meter) for more robust options. Material and load capacity significantly affect cost: stainless steel or heavy-duty trays for high-density installations are priced higher than standard carbon steel trays. Bulk orders and custom dimensions may further influence pricing, and contacting suppliers directly is recommended for accurate quotes and delivery details.

Key Considerations

Standards Compliance: High-density trays often comply with NEMA VE-1 and IEC 61537, ensuring fire resistance, structural integrity, and load durability.

Installation Factors: Proper spacing (typically 3-6 feet) and support intervals are critical for long-term performance, especially in high-density setups.

Future Expansion: It is advisable to allow 20-30% extra capacity to accommodate future cable additions. For precise pricing, it is best to contact suppliers directly, providing specifications such as material, width, thickness, and required length. Leading suppliers in India include JP Electrical And Controls, Global Manufacturers And Traders, and Parmar Metals Priva...
