

How much does a portable fiber optic cable pulling machine cost

AI Overview

A portable fiber optic cable pulling machine typically costs around \$27,000 to purchase, with rental options starting at \$300 per day. Purchase Costs The average purchase price for a fiber optic cable puller is approximately \$27,061, though this can vary depending on the brand, model, and included features such as capstan size, power source, and load capacity (KWIPPED) . Some models, like the GMP battery-powered puller or TUF-Lugger Lite electric/gas pullers, offer portability and adjustable tension, which may influence the price . Hydraulic models with higher pulling force and advanced controls can cost more. Rental and Financing Options Daily rental: Around \$300/day Weekly rental: Approximately \$979/week Monthly rental: About \$3,075/month Financing: Available at roughly \$545/month on a 60-month lease Renting can be a cost-effective option for short-term projects or testing different models before purchase. Factors Affecting Cost Power Source: Electric, gas, or battery-powered units differ in price and portability . Pulling Capacity: Machines with higher tensile limits or larger capstans are more expensive . Accessories and Packages: Some packages include load cell tension systems, controllers, and remote triggers, which can increase the cost . Condition: New machines cost more than used or refurbished units . Summary For a professional-grade portable fiber optic cable puller, expect to pay \$25,000–\$30,000 for purchase, or consider rental options starting at \$300/day for short-term use. Additional features, power type, and pulling capacity will influence the final cost, so requesting quotes from suppliers is recommended to compare models and packages .
