

How to wind the cable around a fiber optic terminal box

Overview

Extending the fiber through the box makes use of a cable entry gland. Fasten the cable to the clamps or ties to assure the cable is immovable. Remove the cable jacket and buffer coating. A fiber termination box is the standard instrument used in fiber optic networks to connect, secure, and protect optical fibers at the terminating point. It functions as a junction between the incoming fiber cable and the outgoing customer-side fiber cable, where one fiber can be spliced, patched. FTTP or fiber To The Premises applications have reinforced the importance of reliable and stable fiber optic terminations. And tools used for fiber fusion: fusion splicer; fiber cleaver; cable stripper; fiber optic stripper; alcohol;. Learn how to install a fiber optic termination box step-by-step for FTTH projects. Covers mounting, splicing, routing, labeling, and testing for indoor/outdoor use.
