

How to wire a distribution box with a protection board

Overview

Include protection devices like breakers, fuses, and surge protectors—each circuit should have its own protection. Comply with standards: Follow NEC, IEC, or local codes. Use UL/CE-certified parts and record installation details for future inspections. Before powering on, perform visual checks and. A distribution board or distribution box is where the main power supply is distributed to multiple loads. Whether you're an electrician or a DIY enthusiast, this guide will help you understand the basics of home electrical distribution. It includes isolator, RCCB (Residual current circuit breaker) or RCD (Residual-current device) devices, protective fuses or MCB's (Miniature Circuit Breaker). Distribution board is a safe system designed for house or building that included protective devices, isolator switches, circuit breaker and fuses to connect safely the cables and wires to the sub circuits and final sub circuits including their associated Live (Phase) Neutral and Earth conductors.
