

Huawei Optical Splitter Distribution Box

Overview

The Box FCDB-H216M1 is mainly used as CTO (optical terminal box) termination box for subscriber connections and distribution in FTTx networks and supports splicing and fiber division. Its design allows easy installation of the wiring as well as its reopening for maintenance. With Huawei's core concept for ODN construction centering on full and dense coverage coupled with short and easy access, Huawei's ODN 3. In the earliest FTTH solution, ODN 1. The splitter has different splitting ratio which covers N:2 to N:64 (N=1, 2). Max. Pre-connectorized FttH PLC Splitter Box for Huawei Connector Fiber Splitter Box provides a high density wall mounted, pole mounted and aerial mounted solution for next generation networks, which aims to provide and manage fiber splitters in a limited space.
