

Indoor two-core optical cable price

AI Overview

A 2-core indoor optical fiber cable typically costs between \$0.13 and \$6 per foot, depending on type, jacket, and quality. Price Range Basic indoor 2-core FTTH drop cables: Around \$0.13 per foot for simple, single-mode cables suitable for short indoor runs. Higher-quality single-mode cables with LSZH jackets: Typically \$1.50 to \$6 per foot, reflecting better materials, bend-optimized fibers, and compliance with modern standards like G.657.A2. Wholesale bulk purchases: Can reduce costs to \$0.09 to \$1.52 per foot, depending on order size and supplier. Factors Affecting Cost Fiber Type: Single-mode (OS2) is generally cheaper per foot than multimode (OM3/OM4), but multimode may be preferred for short-distance high-speed applications. Jacket Material: LSZH (Low Smoke Zero Halogen) jackets are more expensive than standard PVC but are safer for indoor use. Pre-Termination: Cables with factory-installed connectors cost more than bulk cables that require on-site termination. Construction and Rating: Indoor riser-rated cables are less expensive than plenum-rated cables designed for air-handling spaces. Practical Considerations For short indoor runs, a standard 2-core LSZH single-mode cable is sufficient and cost-effective. Buying long reels (e.g., 1 km or more) directly from manufacturers can significantly reduce per-foot costs. Avoid over-specifying armored cables for indoor use unless there is a risk of physical damage, as this increases cost unnecessarily. In summary, for a typical indoor 2-core optical fiber cable, expect to pay \$0.13 to \$6 per foot, with the exact price depending on fiber type, jacket material, and whether the cable is pre-terminated or purchased in bulk.
