

Intelligent controller switch for power distribution cabinet

Overview

Abstract: The intelligent control device can be used for 3~35kV indoor high-voltage switch cabinets, suitable for various switch cabinets such as central cabinets, handcart cabinets, fixed cabinets, ring network cabinets, etc., with a primary circuit simulation diagram. An Intelligent Control Device for Switch Cabinet is an advanced electronic smart meter management device designed to provide monitoring, control, protection, and communication functions within electrical switch cabinets or motor control centers (MCCs). These devices by Elecnova are integral. ABB's portfolio of smart control cabinets offers a convenient and cost-effective solution for effortless integration – equally suitable for new and retrofit installations. Leveraging Xerus Technology Platform, all Raritan power distribution products improve uptime and availability by making power management. Managing and installing a rack power distribution unit (PDU) has never been easier than with the EL2P PDU. The requirements of GB3906 “-35KV AC Metal-enclosed Switchgear” DLT404 “Technical Conditions for Ordering.
