

Manufacturer of Fire-Resistant Cable Trays for Low Voltage Flow

AI Overview

Leading manufacturers of fireproof cable trays for low voltage systems include Cablofil, ABB, NewReach, Flamro, and Meka Pro, offering certified solutions that maintain electrical safety during fire events. Key Manufacturers and Their Offerings

Cablofil (Thorne & Derrick UK) Cablofil specializes in fire-resistant cable basket tray systems suitable for low and high voltage cables, including Prysmian FP and Draka Firetuf types. Their cable trays are tested according to the stringent German DIN 4102-12 standard, ensuring fire resistance for 30, 60, and 90 minutes at temperatures up to 1000°C. Cablofil trays are widely used in construction, power, oil, gas, petrochemical, rail, and utilities industries, and are recommended to be paired with Ellis Patents Phoenix Cable Cleats for optimal fire safety.

ABB ABB manufactures a broad range of cable tray systems, including perforated trays, cable ladders, channel trays, and strut metal framing. Their products are designed for durability, adaptability, and ease of maintenance, reducing fire risks by preventing moisture buildup and cable insulation damage. ABB's production facilities in Canada and Saudi Arabia ensure rapid delivery and support for low voltage installations across various regions.

NewReach NewReach offers fire-rated cable trays engineered to withstand high temperatures and prevent flame propagation. Their trays are made from materials such as powder-coated aluminum, galvanized steel, and fiberglass with intumescent coatings. They comply with international standards including ISO 834-1, EN 1363-1, DIN 4102-12, and AS/NZS 3013:2005, providing up to a 2-hour fire rating at 1050°C. NewReach trays are designed for heavy loads, non-toxic fire resistance, and uninterrupted operation of critical systems during emergencies.

Flamro Flamro provides fire protection solutions for cable systems using FLAMMOTECT-A coatings...
