

Mc200 Microcomputer Relay Protection Tester

Overview

The main control board is DSP + FPGA architecture, 16 bit DAC output, generates high - density sine wave 2000 points each circle to fundamental wave, which greatly improve the wave quality and the accuracy of the test instrument. As the protection relay and the primary equipment in the medium-voltage substations are close to one.

1. Classic Windows XP operating interface, friendly man-machine. The DDG Primary Current Injector Test Set is a high-current test device used to generate controlled large currents for safety testing, CT calibration, temperature-rise and. The power operation department uses microcomputer relay protection testers to regularly calibrate and maintain the. RelaySimTest is a software solution for system-based protection testing with OMICRON test sets.

Article Content

Classification and Selection Methods for Relay

ZCAR-1600 microcomputer relay protection tester adopts high performance industrial PC as the control microcomputer and Windows operating

HT-702 Protection Relay Test Set

HT-702 Protection Relay Test Set Microcomputer relay protection tester is in reference to issued by the ministry of the type of microcomputer relay protection test device technical conditions (discussion

LND-802 Microcomputer Relay Protection Tester

It can test not only various traditional relays and protection devices, but also various modern microcomputer protections, especially for transformer differential

Microcomputer Secondary Current Injection Test Set

It is applied to test protection replay based on voltage and current operation. The main function of the tester include: calibration of voltage and current operation

Microcomputer 3 Phase Secondary Current Injection Relay Protection Tester

HZJB-340A Microcomputer Relay Protection Tester is a new,compact microcomputer relay protection tester developed by extensively consulting user feedback and summarizing the advantages and

RelaySimTest

RelaySimTest is a software solution for system-based protection testing with OMICRON test sets. The software simulates realistic operational statuses and

Protection relay testing and diagnostic solutions

Verify that your protection relays operate correctly when faults occur. Megger's smart relay testing solutions and expert support help you validate

Protection relay testing device, Protection relay test

The power operation department uses microcomputer relay protection testers to regularly calibrate and maintain the protection devices in the power system.

Relay protection tester,microcomputer relay protection tester,relay ...

KDJB-1200Y Relay Protection Tester with GPS The KDJB-1200Y is a high-performance, six-phase relay protection tester engineered for comprehensive validation of modern protective relays and

How to use the microcomputer relay protection tester

To use the microcomputer relay protection tester correctly, it is necessary to follow a series of operating steps and precautions to ensure the

Relay protection tester

The microcomputer relay protection tester is an intelligent testing device that integrates microprocessor technology, advanced electronic measurement technology, and software algorithms.

Relay protection microcomputer tester

It can simulate various fault states in the operation of power systems, such as short circuits, grounding, etc., and then observe whether the relay protection device can timely and

Microcomputer Relay Protection Testers

Designed for simplicity and precision, the single-phase microcomputer relay protection tester is optimized for testing relays in single-phase power systems or individual phase analysis in three

LND-802 Microcomputer Relay Protection Tester

1.Meet all test requirements on site.The instrument has standard four phase voltage and three-phase current output. It can test not only various traditional relays and

Three phase relay protection microcomputer test system

Test-330 three phase microcomputer protection relay test system is the highly efficient relay test equipment of GFUVE company. It is produced by referring to technical condition for "DL/T624-2010"

Protection relay testing and diagnostic solutions

Verify protection schemes during commissioning and maintenance to ensure reliable system operation. Megger's relay testing solutions help prevent

WXJB-902 Microcomputer 3 Phase Relay Protection

It can complete the most testing work, including all sorts of relay and microcomputer protection test, and can simulate all kinds of complicated instantaneity,

How to choose the type of microcomputer relay

The microcomputer relay protection tester is a computer-controlled testing instrument for power system protection devices. It has the characteristics

Functional Testing of Microcomputer Protection Devices: Verifying ...

For testing high-voltage microcomputer protection devices, it is recommended to use a microcomputer relay protection tester capable of simultaneously outputting three-phase voltage and three-phase

Protection Relay Testing

Reliably working protection relays are key in modern energy systems. Read on to learn about best practices, challenges, and trends in protection testing.

Protection Relay Tester

Smart Multi-phase Relay Protection Tester is a new generation of intelligent relay protection test equipment for Substation ABB, Siemens, SEL, Schneider, NR

Application Research of Microcomputer Relay Protection in Power

According to the requirements and characteristics of performance test in the process of research and development of relay protection device, a general automatic test system for relay protection device is

Microcomputer Relay Protection Tester Kit 6 Phase Relay Protection ...

Digital Signal Processor Microcomputer. Not only test the traditional relays and protectors, but also test the modern microcomputer relays, special for transformer differential protection and transfer

Microcomputer Three Phase Relay Protection Tester -

Microcomputer Three-Phase Analog and digital device for relay protection testing with high accuracy, supports various phase current and voltage channels.

Microcomputer relay protection tester test note

1. The microcomputer relay protection tester and Windows operating system are built in. Please do not switch the power supply of the host too frequently.

Relay and Protection Testing

PONOVO is one of the most professional relay and protection testing manufacturers and suppliers. Our factory offers high quality relay and protection testing made in
