

Network rack equipment location pricing

AI Overview

Network rack and colocation costs vary by location, power usage, and rack type, with U.S. full racks typically ranging from \$900 to \$2,500 per month, and high-density AI racks exceeding \$3,000 per month. Colocation Pricing by Location and Power Colocation pricing depends on space, power, connectivity, and location. In North America, average rates for 250–500 kW deployments are around \$196 per kW per month, with larger deployments seeing higher increases due to low vacancy and high demand. Regional variations are significant: Atlanta is among the most affordable U.S. markets (\$180–\$185 per kW), while Silicon Valley remains one of the priciest. Internationally, Singapore can range from \$310 to \$470 per kW. Power consumption is now the primary cost driver, especially for high-density AI workloads requiring 20–100 kW per rack, compared to standard enterprise racks at 3–5 kW.

Rack and Cabinet Pricing

Colocation facilities offer full racks (42U), half racks (18–22U), quarter racks, and private cages. Typical pricing in Tier 3 U.S. facilities includes:

- Standard full rack (3–5 kW): \$900–\$2,500 per month
- High-density AI rack (10–30 kW): \$3,000–\$6,000+ per month
- Single rack units (1U): \$79–\$300 per month depending on location and market tier

Additional costs may include cross-connects, bandwidth, remote hands, and installation fees (\$100–\$500 one-time, plus \$150–\$300 monthly for network connections).

Physical Rack Equipment Costs

Purchasing network racks and cabinets involves upfront hardware and installation costs:

- Standard rack installation: \$500–\$2,000 per rack
- High-density rack installation: \$2,500–\$5,000 per rack
- Custom modular racks: \$3,000–\$6,000 depending on specifications

Networking equipment: \$500–\$5,000 per unit (routers, switches, firewalls)

Cable management: \$200–\$3,000 per rack depending on complexity

Power and cooling infrastructure: PDUs \$200–\$1,500, UPS \$1,000–\$10,000, cooling \$500–\$5,000
