

North Africa Optical Cable

Overview

The Medusa cable, owned by AFR-IX Telecom, is a game-changer. It's not just connecting dots on a map—it's stitching together Morocco, Tunisia, Libya, Algeria, and Egypt with Europe, creating a high-capacity digital corridor where one didn't exist before. This is a list of terrestrial fibre optic cable projects in Africa. While submarine communications cables are used to connect countries and continents to the Internet, terrestrial fibre optic cables are used to extend this connectivity to landlocked countries or to urban centers within a country. Africa's journey toward digital transformation is gaining momentum, and at the core of this progress lies the expansion of optical fiber, bundles, and cables in the region. Analysts project that the continent's fiber market could grow to USD 2.1 billion by 2035, a milestone that reflects both the. YOA Cable, Africa's largest optical fibre cable manufacturer, is known for delivering world-class optical fibre products and exceptional customer service. We anticipate market needs, innovate and constantly refine our manufacturing processes and products to deliver faster speeds and more flexible. The launch of 2Africa enables us to offer our customers seamless connection between Africa and Europe, together with our SEA-ME-WE 5 and AAE-1 subsea cable resources to further extend to Asia, which is an important milestone of our global development strategy,” said Jessica Gu, Director & Chief. Large parts of west and central Africa, as well as some countries in the south of the continent, were left without internet services on 14 March because of failures on four of the fibre optic cables that run below the world's oceans. Nigeria, Côte d'Ivoire, Liberia, Ghana, Burkina Faso and South. particular in West and Central Africa, as well as Eastern Africa. The cable system could see extensions al terranean will connect Northern African countries to EU countries.
