

Panama Access Switch 100G

Overview

Developed in alignment with the SOSA™ and CMOSS technical standards, this 3U OpenVPX plug-in card supports data rates up to 100 Gbps and offers dual real-time switching in physically separated enclaves, enhancing security and accelerating certification for sensitive mission systems. FS 100G Switches offer high programmability and scalability, designed for large enterprises and hyper-converged infrastructure (HCI) networks. Learn more! FS 100 Gigabit data center switches with build-in Broadcom switch chip provides powerful hardware switching capacity and data center features (supporting stacking, MLAG, RoCEv2, PFC, ECN, VxLAN, EVPN, REUP, etc), making them ideal for cloud data center and high-end campus network. These switches deliver speeds of up to 100Gbps, making them ideal for high-demand applications such as big data analytics, cloud computing, and high-performance. The SX-153 is a next-generation, high-speed Ethernet switch designed for mission-critical Cyber, EW, SIGINT, and Comms applications across air, land, and sea platforms. The 3232C, part of the Cisco Unified Fabric family, is a compact, 1-rack-unit (1RU), form factor switch for top-of-rack (ToR) data. This category offers switches of various designs with a maximum data rate of up to 100G. The fiber optic ports are designed as SFP slots, therefore you can connect to any fiber type or different wavelengths by choosing a suitable SFP module.
