

Patch Cord Fiber Optic Connector Equipment

Overview

Fibre optic patchcords are single-, dual-, or multifibre data cables that are factory-assembled with the commonly used fibre optic connectors – LC, SC, E-2000, MTP, SN, CS, MDC, etc. – and are used to connect IT hardware (e. switches, servers) equipped with fibre optic. As networks move to higher speeds and higher density, choosing the right fiber optic patch cords becomes critical to the reliability of your system. You plug one. Our Fiber Optic Patch Cord Production Line equipment includes everything needed to manufacture high-quality patch cables and pigtails: from cable making machines and pneumatic crimpers to precision polishing fixtures and IL/RL test stations. They act as the critical link for interconnecting devices like optical switches, servers, and distribution frames.
