

Philippine AI joins the server

Overview

Following its successful energization in July 2024 and the deployment of its first anchor tenant, VITRO Sta. Rosa (VSR), the Philippines' first AI-ready hyperscale data center, has reached another milestone with the activation of NVIDIA-powered graphic processing unit (GPU) servers. Inside Pax Silica, the US-led plan to turn a former air base in Tarlac into the country's first AI data center hub A 4,000-acre stretch of land in New Clark City, Tarlac, is about to become the centerpiece of a much bigger story than just another industrial park. It is the first physical site under. HealthAI – The Global Agency for Responsible AI in Health, welcomes the Philippines as an official member of the HealthAI Global Regulatory Network (GRN), a global platform uniting health regulators dedicated to the safe and effective implementation of artificial intelligence (AI) in health. By. Germany's decision to join the Pax Silica Initiative strengthens the Philippines' push to become a strategic hub for semiconductors, artificial intelligence, and advanced manufacturing, adding one of Europe's industrial powerhouses to a growing coalition reshaping global technology supply chains., Inc and launched their new ASUS NUC AI and AI server lineup. Building on ePLDT's earlier rollout of.
