

Power strip in distribution box

AI Overview

Power strips for distribution boxes allow safe and organized distribution of electricity to multiple devices, with options for AC or DC, surge protection, and mounting flexibility.

DC Power Distribution Strips For DC applications, heavy-duty power strips like the F-1048W DC power distribution strip offer multiple outputs, including 6 power pole positions and 4 banana jack outputs, supporting up to 60V AC/DC and 30A per position. These units feature aluminum enclosures, screw or wall mounting, and compatibility with DIN rail brackets for professional setups. They are ideal for amateur radio setups, lab equipment, or other DC-powered devices.

AC Power Distribution Boxes For AC power, products like the FieldPower® power distribution box provide 3-phase AC distribution with IP65-rated enclosures for protection against dust and water. These boxes use insulation displacement connections (IDC) and push-in terminals, ensuring safe and efficient electricity distribution to multiple consumers. They are suitable for industrial or outdoor applications where robust protection is required.

Surge-Protected Power Distribution Units If protection against voltage spikes is needed, surge-protected power strips or PDUs are available with current ratings from 150 mA to 310 A and voltage ratings from 5 V to 1.5 kV, offering energy absorption from 50 J to 6480 J. These units can include outlet boxes, strips, or modules and are suitable for sensitive electronics or event setups.

Rackmount and Event Power Strips For professional or stage setups, rackmount power strips provide multiple outlets (up to 16), often with on/off switching, circuit breakers, and permanently attached cords. Some models include switchable IEC outlets and convenience outlets for flexible power management. These are ideal for server racks, audio/video equipment, or event technology setups.

Key Considerations

- Voltage and Current Ratings:** Ensure the strip matches your devices' requirements.
- Mounting Options:** Wall, desktop, or DIN rail mounting depending on installation.
- Protection Fe...**
