

Price of 288-core fiber optic cable junction box

AI Overview

The price of a 288-core optical fiber junction box ranges from approximately \$4.50 per unit for basic models to higher prices for fully equipped enclosures with splice trays and PLC splitters.

Pricing Overview

Basic units: Some manufacturers, such as Fibconet, offer a full set of 288-core junction boxes including accessories for \$4.50 per unit, emphasizing cost efficiency and professional shipping options (Fibconet).

High-capacity outdoor enclosures: Models with integrated PLC splitter slots, IP68 waterproofing, and multiple splice trays typically have higher prices, which are often negotiated with suppliers depending on order quantity and shipping requirements.

Alibaba listings: FDT 288-core optic distribution cabinets with insertion module PLC splitters are available, but the exact price depends on customization, minimum order quantity, and shipping, which must be discussed directly with the supplier.

Product Features Affecting Price

Number of splice trays: Standard 288-core boxes may include 12–24 trays, each holding 8–24 fibers, affecting the cost.

Material and durability: Outdoor enclosures made from high-quality engineering plastics with corrosion resistance and IP68 sealing are more expensive than basic indoor models.

Integrated components: Inclusion of mini PLC splitters, adapter terminations, and cable management features increases the price.

Mounting options: Wall, pole, underground, or aerial installation flexibility can influence cost.

Purchasing Considerations

Minimum order quantity: Many suppliers require bulk orders (e.g., 50 units) for customized options.

Shipping and delivery: Costs vary depending on destination and logistics; some suppliers offer professional freight forwarding to reduce shipping expenses.

Warranty: Standard warranties range from 1–2 years for fiber components and enclosures.

In summary, while basic 288-core junction boxes...
