

Price of 4-core anti-electro-trace optical cable for Bahrain base stations

AI Overview

The price of 4-core armored or anti-electro-trace optical cables suitable for base stations ranges from approximately \$0.40 to \$2.04 per meter, depending on type, length, and manufacturer. Pricing Overview The cost of 4-core fiber optic cables depends on several factors including single-mode vs multimode, armored or LSZH jackets, outdoor suitability, and length of the cable. For example, OWIRE Solutions lists prices starting at \$0.40 per meter for basic indoor cables and up to \$1.80 per meter for ruggedized outdoor or armored cables designed for harsh environments. A standard 100-meter reel of single-mode OS2 4-core cable typically costs \$60–\$90, with bulk discounts available for orders exceeding 1,000 meters. Alibaba offers 4-core armored fiber optic cables starting at \$2.04 per unit, with minimum orders of 10 units, suitable for outdoor FTTX or base station deployment. Factors Affecting Price Cable Type: Single-mode cables (OS2, G652D) are more expensive than multimode (OM3/OM4) due to longer transmission capabilities. Jacket Material: Armored or LSZH jackets increase durability and price, especially for outdoor or anti-electro-trace applications. Length: Longer cables cost more upfront but provide flexibility for installation across base station sites. Manufacturer and Certification: Reputable brands with ISO/IEC or TIA/EIA compliance may charge a premium but ensure lower attenuation, higher tensile strength, and better temperature resilience. Recommendations for Bahrain Base Stations Single-mode armored cables are recommended for long-distance outdoor runs between base stations. Bulk purchasing can reduce per-meter costs, especially for large-scale deployments. Verify certifications and factory testing reports to ensure reliability in harsh outdoor conditions. Consider suppliers like OWIRE, VCELINK, or Alibaba distributors who prov...
