

Price of 4-core fiber optic cable junction box for security applications in Singapore

AI Overview

A 4-core fiber optic junction box for security applications in Singapore typically costs between SGD 25 and SGD 80, depending on features and installation type.

Overview and Applications A 4-core fiber optic junction box is a compact enclosure designed for terminating and distributing up to four optical fibers. It is widely used in residential buildings, commercial offices, data centers, and outdoor security installations such as CCTV networks or street surveillance systems. These boxes support fusion splicing, direct termination, or patching, and can house small PLC splitters (1:2 or 1:4) for network distribution.

Price Range and Factors Basic indoor wall-mount boxes: SGD 25-40. These are lightweight, compact, and suitable for indoor security cabling or small FTTH setups. Outdoor or weatherproof boxes (IP65-IP67): SGD 50-80. These models are made from ABS or PC materials, providing protection against dust, rain, and UV exposure, ideal for pole or street installations. Fully loaded termination boxes with SC/LC adapters: SGD 60-80. These include splice trays, cable fixation devices, and support for multiple connector types, offering easier maintenance and higher reliability.

Key Features to Consider IP Rating: For outdoor security applications, choose IP65 or higher to ensure waterproof and dustproof protection. Material: Flame-retardant ABS or PC ensures durability and mechanical protection. Connector Compatibility: SC, LC, or FC adapters allow flexible integration with existing fiber networks. Mounting Options: Wall-mount or pole-mount designs facilitate installation in various environments. Capacity and Expandability: Even though it is a 4-core box, some models allow limited expansion or integration with splitters for future network growth.

Purchasing Options in Singapore Local distributors and telecom suppliers often stock 4-core fiber distribution boxes suitable for security and FTTH application...
