

Price of Double-Layer Cable Tray Brackets

AI Overview

Double-layer cable tray brackets typically range in price depending on size, material, and supplier, with exact costs available through direct supplier quotes. Overview Double-layer or double-tier cable tray brackets are designed to support multiple cable trays or ladder systems simultaneously, providing efficient space utilization and secure suspension. For example, the 225mm double-tier trapeze bracket supports cable trays up to 225mm wide with a 500mm drop length, offering pre-assembled, ready-to-use suspension for faster installation and professional-grade stability (Direct Channel UK). Material and Features These brackets are commonly made from galvanized steel, stainless steel, or aluminum, offering high load capacity, corrosion resistance, and long-term durability. Wall-mounted versions provide space-saving installation and comply with standards such as EN 61537 for cable management systems (Ekabel). Pricing Guidance McMaster-Carr offers a wide range of cable tray mounting brackets, but prices vary by size, material, and quantity. They provide same-day or next-day delivery for standard items. Direct Channel UK provides trade and bulk pricing upon request, which is ideal for contractors or large projects. Ekabel and other European suppliers also offer wall and ceiling-mounted brackets, with pricing available through direct inquiry for specific configurations. How to Obtain Prices Since prices fluctuate based on material, size, quantity, and shipping, the most accurate method is to: Contact suppliers directly via phone or email for a quote. Specify the bracket type, dimensions, and quantity to receive trade or bulk pricing. Check online catalogs for standard items, which may list approximate prices or allow online ordering. By reaching out to suppliers like McMaster-Carr, Direct Channel UK, or Ekabel, you can obtain current pricing tailored to your project requirements.
