

Price of Double-Layer Galvanized Cable Trays

AI Overview

Double-layer galvanized cable trays typically range from \$50 to \$200 per 2.4–3 meter section, depending on size, duty rating, and finish. Pricing Overview The cost of double-layer or ladder-type galvanized cable trays depends on several factors:

- Material and Finish:** Hot-dip galvanized trays are more corrosion-resistant and suitable for both indoor and outdoor use, generally costing more than pre-galvanized steel trays.
- Length and Width:** Standard lengths are usually 2.4 meters or 3 meters, with widths ranging from 50mm to 600mm. Wider trays or longer sections increase the price.
- Duty Rating:** Light, medium, and heavy-duty trays differ in load capacity. Heavy-duty trays designed for industrial or high-density cabling environments are priced higher.
- Accessories:** Couplers, bends, tees, and lids are sold separately and can add to the overall cost.

Estimated Price Range

- Medium-duty double-layer galvanized trays: Approximately \$50–\$100 per 2.4-meter section.
- Heavy-duty double-layer trays: Approximately \$120–\$200 per 2.4–3 meter section, depending on width and thickness.

Fittings and accessories: Straight couplers, bends, and risers typically range from \$5 to \$30 per piece, depending on size and material.

Purchasing Options

- Direct suppliers:** Companies like Direct Channel and EAE Electric offer a wide range of galvanized cable trays with customizable lengths and duty ratings.
- Online marketplaces:** Platforms like eBay UK provide competitive pricing and delivery options for galvanized cable trays, though specifications may vary.
- Custom orders:** For industrial or large-scale projects, trays can be manufactured in longer lengths (up to 6 meters) or with specific load capacities, which may affect pricing.

Key Considerations

When budgeting for double-layer galvanized cable trays, consider:

- Environmental exposure:** Hot-dip galvanized trays are preferred for outdoor...
