

Price of Fiber Optic Cable Network Cover

Overview

Home and business fiber optics projects typically range from a few hundred to several thousand dollars, depending on run length, fiber type, and labor needs. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Fiber optic cables consist of multiple fibers, each designed for high-speed data transmission. These fibers are thin strands, often as small as a human hair, that transmit data as pulses of light. With prices ranging from \$1 to over \$ 50 per linear foot, depending on the installation method. Verizon Home Internet is available throughout New York City, including Manhattan, Brooklyn, Queens, the Bronx, and Staten Island, through Verizon Fios or 5G Home Internet. Verizon Fios Home Internet is the premium 100% fiber-optic option. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination.
