

Price of Fiberglass Cable Tray Covers in the United States

AI Overview

Fiberglass cable tray covers in the U.S. typically range from \$25 to \$150 per linear foot, depending on size, type, and manufacturer.

Overview Fiberglass cable tray covers, often made from Fiber Reinforced Polymer (FRP) or Glass-Reinforced Polymer (GRP), are designed to protect cables in harsh environments, including chemical plants, offshore platforms, and water treatment facilities. They are non-conductive, corrosion-resistant, and lightweight, offering a strong alternative to steel or aluminum covers.

Factors Affecting Price

- Tray Size and Width:** Wider or deeper trays require more material, increasing cost. Standard widths range from 6 inches to 24 inches, with larger sizes costing more.
- Type of Cover:** Solid covers, ventilated covers, or hinged designs vary in price. Solid covers provide maximum protection, while ventilated covers allow airflow but may be slightly cheaper.
- Material Quality:** Premium pultruded FRP or GRP materials designed for extreme chemical or structural conditions are more expensive than standard fiberglass.
- Manufacturer and Brand:** Leading U.S. manufacturers like MP Husky, Atkore, and Creative Composites Group offer high-quality fiberglass trays and covers, which can command higher prices due to certification, durability, and compliance with NEMA and UL standards.
- Customization and Accessories:** Made-to-order sizes, pre-drilled holes, or integrated mounting systems can increase the cost.

Typical Price Range

- Small to medium trays (6-12 inches wide): \$25-\$60 per linear foot
- Large trays (18-24 inches wide): \$80-\$150 per linear foot
- Specialized or heavy-duty FRP covers: \$120-\$200 per linear foot for extreme environments

Purchasing Tips

- Request quotes from multiple U.S. suppliers to compare pricing and lead times.
- Verify UL and NEMA certifications to ensure compliance with safety and performance standards.
- Consider bulk orders or...
