

Price of Fireproof Sealing Boards for Cable Trays

AI Overview

Fireproof sealing boards for cable trays typically range from \$20 to \$100 per board, depending on material, size, and supplier.

Overview Fireproof sealing boards are used to protect cable trays and electrical installations from fire, smoke, and heat. They are commonly made from intumescent materials, fire-resistant boards, or composite sheets reinforced with steel mesh or aluminum foil for durability and compliance with fire safety standards. These boards are suitable for industrial, commercial, and critical infrastructure applications, including hospitals, power plants, and high-rise buildings.

Price Range Standard boards: \$20–\$50 per board for basic fireproof panels suitable for small cable trays or indoor installations. High-performance or certified boards: \$50–\$100 per board for boards with enhanced fire ratings, intumescent properties, or compliance with international standards. Bulk orders: Prices may decrease significantly for large quantities, especially when sourced from manufacturers in China or via wholesale platforms.

Factors Affecting Price Material composition: Boards with steel reinforcement, aluminum foil, or intumescent layers cost more. Size and thickness: Larger or thicker boards provide better fire protection but increase cost. Certification and fire rating: Products certified for high fire-resistance ratings (e.g., 2-hour or 4-hour fire rating) are more expensive. Supplier and shipping: International suppliers may offer lower base prices, but shipping and import duties can affect the final cost.

How to Obtain Exact Pricing Contact suppliers directly, such as Shanghai Lanyan Fire Protection Engineering Co., Ltd. for OEM/ODM options and bulk pricing. Check wholesale platforms like Alibaba for competitive quotes and customizable options. For U.S. or local markets, suppliers like Hilti or Eaton may require registration or direct inquiry to access pricing. By considering these factors,...
