

Price of Inverter Distribution Box

AI Overview

The price of an inverter distribution box typically ranges from \$50 to \$500 or more, depending on type, capacity, material, and customization options.

Factors Affecting Price

Type of Distribution Box: AC Distribution Boxes manage AC power and are generally less expensive. DC Distribution Boxes handle DC power, often used with solar or battery systems, and may cost more. PV Combiner Boxes for solar off-grid systems vary by voltage and current rating, e.g., 48V/5kW or 48V/8kW systems, which affects price.

Material and Build: Plastic enclosures are lighter and cheaper. Aluminum or stainless steel boxes offer higher durability and environmental resistance, increasing cost.

Size and Capacity: Wall-mounted boxes are compact and generally lower in price. Floor-standing or larger enclosures for complex systems are more expensive due to higher capacity and additional components.

Customization and OEM Options: Custom features like modular busbars, IP-rated enclosures, or branding can increase the price. Wholesale orders may reduce per-unit cost.

Supplier and Location: Prices vary by supplier, shipping, and regional availability. Online platforms like Alibaba or Made-in-China provide a wide range of options and quotes.

Typical Price Ranges

- Small wall-mounted inverter distribution boxes: \$50–\$150
- Medium-sized DC or AC boxes: \$150–\$300
- Large PV combiner or floor-standing boxes: \$300–\$500+
- Customized or high-capacity industrial boxes: Contact suppliers for quotes, as prices depend on specifications and order volume.

For accurate pricing, it is recommended to contact suppliers directly with your specifications, including voltage, current rating, material, and any customization requirements, to receive a tailored quote.
