

Price of Optical Cable Identification Ties

AI Overview

Optical cable identification ties typically range from \$10 to \$50 per pack, depending on size, type, and quantity. Overview Optical cable identification ties, also known as ID cable ties or flag cable ties, are used to label and organize fiber optic cables for easy identification. They often feature a write-on tag or flag for labeling bundles and come in various sizes to fit different cable diameters. Price Ranges Amazon offers a variety of ID cable ties from small business brands, with prices generally starting around \$10 for small packs and increasing based on quantity and tie length. Grainger provides industrial-grade identification cable ties, often sold in packs of 100 or more, with prices typically ranging from \$15 to \$40 per pack, depending on material and size. McMaster-Carr carries specialized cable identification ties, including plastic write-on tags and ID tag cable ties, with prices starting around \$12 per pack and increasing for larger or heavy-duty options. Specialty suppliers like Linemen Tools offer fiber optic cable tags and wrap-around labels, which can cost \$20 to \$50 per pack, especially for high-visibility or caution-marked tags. Factors Affecting Price Material: Nylon or plastic ties are generally less expensive than heavy-duty or UV-resistant versions. Size and Length: Longer ties or larger ID flags increase the cost. Quantity: Bulk packs reduce the per-unit price. Special Features: Pre-printed caution labels, high-visibility colors, or write-on surfaces can increase the price. Purchasing Tips Check product specifications to ensure the tie fits your cable diameter. Consider bulk purchases for large projects to save on cost. Compare industrial suppliers vs. online marketplaces for availability and shipping speed. By reviewing these sources, you can find optical cable identification ties that fit your budget and project requirements.
